Sight Words	Sight Word Practice Idea				
	<p><u>Sight word Work - Rainbow Write Sight Words:</u> Choose 5 or 6 crayons (or markers / pencil crayons). Start writing a chosen sight word with one color, then keep writing over it with each additional color. When you are done, your words will look like rainbows. Use this method to write each of your spelling words.</p> <p><u>Kindergarten Sight words:</u> a, am, and, are, at, can, come, dad, go, he, here, I, in, is, it, like, little, look, love, me, mom, my, no, play, said, see, she, that, the, this, to, up, was, we, went, with, yes & you</p> <p><u>Enrichment:</u> for students who already know these words, they can work on the grade one list found on our kindergarten website - datlkindergarten.weebly.com</p>				
Reading	It is very important to practice reading every day so children can retain and build upon reading skills. They can either read books that you have at home or click onto the links for reading practice. An account has been set up for your child on Razkids https://www.kidsa-z.com/main/Login Extra reading activities can be found on Starfall Learn to Read https://www.starfall.com/h/ltr-classic/ or Headsprout https://www.kidsa-z.com/main/Login				
Writing	<p>Write a letter to someone special, your teacher, your friend or a grandparent. Just stretch out the sounds you hear and you'll do great. Don't forget to add a picture. Remember to start each sentence with an uppercase, put finger spaces between words, and end each sentence with punctuation. Remember to sound words out that you don't know and put down the sounds that you hear but if they are one of your sight words, find them in the list above and spell them correctly.</p> <p>OR Write about Spring – look around outside to find signs of spring. Write about what you saw, what did you hear? What changes are happening outside? What are the animals doing? Remember to draw a picture to match your story. Enrichment: In addition to using MILLION DOLLAR words, add detail to your sentences – <i>Who</i> were you with, <i>what</i> happened, <i>when</i> did you go, and <i>where</i> did this take place.</p>				
Math	<p>Have students play "Number Challenge." Take a deck of regular playing cards (cards numbered 2 to 10 only). Remove the Aces, Jacks, Queens and Kings. Shuffle the cards and pile in the middle. Each player turns up a card; the player who has the bigger number gets both cards.</p> <p>Enrichment: play again but this time the card with the smaller number wins. Or ask "how many more is the bigger number than the smaller one." (Number Pairs to 10) https://www.youtube.com/watch?v=cH7Kz3n2Zk</p>	<p>Comparing Groups – Indoor Bowling Materials: plastic cups, empty cans/plastic bottles, small ball. Make your own indoor bowling alley! Set up 10 plastic cups, empty cans or plastic bottles as pins. Then create a starting line & let your child 'bow!' using a ball.</p> <p>While playing, ask how many pins fell down each time. How many are left? See how many different combinations to 10 they can get (e.g. 6 down & 4 up makes 10). To extend this activity use 11 or 12 + plastic cups, cans or plastic bottles. Have your child identify the combinations that make the whole number. https://www.youtube.com/watch?v=nKO0yQgJAho</p>	<p>Measurement: Have your child use their hand to find 5 objects that are bigger and 5 objects that are smaller (indoors or outdoors). Compare the sizes of the found objects. Vary this activity by using a grown up's hand or other object, as the unit to measure against. Extension: arrange the found objects from biggest to smallest / longest to shortest or heaviest to lightest. https://www.starfall.com/h/geometry/measure-this/</p>	<p>Patterns Use different things in nature or in your house to create an AB, ABC, ABB and AAB patterns. Name the core (the part that repeats). Enrichment: Find things to create an AABC, ABBC or and ABCD pattern. Name the core. https://www.abcya.com/games/fuzz_bugs_patterns</p>	<p>Part-Part-Whole: Play Cover Up. This can be done when eating a snack. Have your child count how many they have (crackers, cereal, grapes, blueberries, etc.) and then cover some up with your hand and see if they can tell you how many you covered up. For example, if they have 5 crackers, after they count them, cover up 2 with your hand and say "You had 5, now you have three out here and the rest are in my hand. How many are in my hand?" Enrichment: extend this activity by using a bigger group of numbers. Numtums Make 10 https://www.youtube.com/watch?v=C5vSGh3f_vE</p>
Are you looking for a Fun Challenge?	<p>Draw and color a rainbow. This link shows how: https://www.youtube.com/watch?v=sYyb95LRTM4 If you want, you can get mom or dad to take a picture of you and your rainbow and email it to your teacher! Let us know what other fun things you are doing at home (yoga, gardening, painting, building puzzles, playing tag in the yard, feeding the birds...). Here are some Spring activities, books, and fun songs. Season song https://www.youtube.com/watch?v=8Zjpl6fgYSY story https://www.youtube.com/watch?v=kBi_RoXKV0o</p> <p>Cosmic kids yoga – Coco the Butterfly https://www.youtube.com/watch?v=pT-s1-phgxs Fluffy slime: https://onelittleproject.com/fluffy-slime/</p>				
Extra Snuggle Time ☺	Snuggle and read a book to your child at bedtime. When reading with your child, make sure he/she looks at the pictures, and ask him/her questions about the story: What happened in the story? Did anything like this ever happen to you? How are the people/animals feeling in the story? Is this story fiction (pretend) or non-fiction (real, based on fact)?
